LEARNPIANO

Build focused piano practice around your own music, follow visual guidance and review your progress.

Product overview

A distinct piano learning, performance and production application asset.

Documented functions

- Import lawful private music
- Follow visual piano guidance
- Use adaptive practice loops
- Review timing and note feedback
- Back up private practice projects

Potential buyer fit

Music education vendors / Creator-tool developers / Piano product teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Practice projects / Progress histories / Private library backups

Profile and full editable brief

Current repository documentation

Current main baseline: v13 established product.

Separate development: v16 - draft evidence-aware model-selection repair.

The established v13 product remains the active baseline. Main includes v16 corpus staging. The real 32/8 development campaign exposed a model-selection failure; draft PR32 uses an evidence-aware recovery score and binds its semantics into checkpoints. The candidate awaits exact-source validation and a new qualified campaign. No v16 product promotion or successful new freeze is claimed.

Material limitations: The v16 model-selection repair remains a draft and does not change the active v13 product, confirm an accepted recovery model or establish a successful new freeze.

Next qualification step: Validate the exact PR32 candidate, rerun development and calibration, and satisfy the confirmation/promotion gates before changing the active product.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Disclosed base/increment budgets reconcile; effort remains an unverified seller assumption. Original financial-reference date: 2026-10-09. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-095-P: current documentation. TA-IP-095-C: financial-reference review, 16 October 2026. TA-IP-095-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
