LYRA-AERO eVTOL

Compare electric-aircraft design options and explore simulated flight and energy assumptions.

Product overview

An electric-aircraft analytical prototype for transparent concept comparisons.

Documented functions

- Review lift and power assumptions
- Compare energy requirements
- Study endurance scenarios
- Explore design alternatives
- Retain analytical audit records

Potential buyer fit

Electric-flight research teams / Engineering consultancies / Aerospace simulation vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Concept comparisons / Energy studies / Design exploration reports

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 50,000	**EUR 450,000**

Current repository documentation

Current main baseline: 0.1.0.

An implemented prototype for evaluation and further development.

Material limitations: Published concept parameters are model assumptions. Physical aircraft performance and certification are not established.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-091-P: current documentation. TA-IP-091-C: financial-reference review, 16 October 2026. TA-IP-091-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
