Maastricht Zero-Hour Simulator

Explore the developing Maastricht driving-simulation project and its foundations for interactive vehicle scenarios.

Product overview

A Maastricht driving-simulation foundation for buyer-led completion.

Documented functions

- Prepare a city simulation project
- Configure vehicle and input foundations
- Record telemetry
- Review modelled damage components
- Retain session and validation records

Potential buyer fit

Driving simulation developers / Vehicle research teams / Interactive experience studios

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Simulation foundations / Telemetry records / Implementation documentation

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/maastricht-zero-hour-simulator/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 120,000	**EUR 650,000**

Current repository documentation

Current main baseline: 0.1.0.

A simulator foundation in development; the complete city model and validated vehicle behaviour remain unfinished.

Material limitations: A complete city, qualified vehicle physics and a compiled production baseline remain unfinished. High-fidelity scope is a development objective.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-089-P: current documentation. TA-IP-089-C: financial-reference review, 16 October 2026. TA-IP-089-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
