Mission-to-Execution Engineering Framework

Turn your project aims into reviewed requirements, dependency-aware plans and planning documents with traceable decisions.

Product overview

An engineering workbench prototype for traceable requirements and execution planning.

Documented functions

- Record mission requirements
- Organise capability and work packages
- Review dependencies and blockers
- Prepare priority-aware plans
- Generate auditable project reports

Potential buyer fit

Engineering consultancies / Programme software vendors / Product development teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Mission charters / Requirement and plan records / Execution review packages

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/mission-to-execution-engineering-framework/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 16,500	**EUR 55,000**

Current repository documentation

Current main baseline: 0.1.0.

Separate development: 0.3.0 - unmerged, stacked traceability/feasibility candidate.

Use the current local planning prototype to prepare requirements, dependencies and design documents. Main passed 24 tests; a separate unmerged v0.3 candidate passed 70 tests and its planning examples. Review labels record supplied declarations and do not independently establish engineering, scientific, legal or operational feasibility. Rights and handover documentation remain open.

Material limitations: The present functions are an early research foundation. Autonomous engineering and cross-domain validation are not established.

Next qualification step: Complete explicit first-party rights, component-obligation and definitive transfer documentation; a repository licence file is not currently identified.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-105-P: current documentation. TA-IP-105-C: financial-reference review, 16 October 2026. TA-IP-105-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
