MOTHERCODE Research Engine

Explore learning and memory in brain-inspired research models and compare their observed behaviour.

Product overview

An experimental neural-dynamics research asset for repeatable computational studies.

Documented functions

- Run neural-dynamics experiments
- Compare declared study settings
- Retain reproducible benchmark records
- Review experimental outcomes
- Prepare research evidence

Potential buyer fit

Computational neuroscience groups / AI research teams / Scientific software vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Experiment records / Benchmark reports / Research documentation

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/mothercode-research-engine/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 45,000	**EUR 400,000**

Current repository documentation

Current main baseline: 18.3.

Separate development: 18.4 research target.

The available research implementation is on a development branch. Wider qualification and biological claims remain open.

Material limitations: The asset is experimental research software. Biological equivalence, consciousness and production readiness are not established.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-037-P: current documentation. TA-IP-037-C: financial-reference review, 16 October 2026. TA-IP-037-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
