Multimodal Evidence Adaptive Systems Platform

Bring different forms of observation together and compare their contribution to your research.

Product overview

A multimodal research prototype for coordinated observation and attributable experiments.

Documented functions

- Organise multiple observation streams
- Review quality and missing data
- Align recorded sessions
- Study adaptive experiments
- Retain research provenance

Potential buyer fit

Sensor research groups / Scientific software vendors / Human-state research teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Observation sessions / Study reports / Replay records

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 115,000	**EUR 650,000**

Current repository documentation

Current main baseline: 0.2.0.

An implemented prototype for evaluation and further development.

Material limitations: Research estimates are distinct from psychological facts or human-state manipulation. Hardware and domain interpretation require separate evidence.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-056-P: current documentation. TA-IP-056-C: financial-reference review, 16 October 2026. TA-IP-056-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
