Evidence Intelligence Operations Platform

Collect authorized source material, track evidence and changes, and prepare traceable intelligence dossiers and delivery bundles.

Product overview

A multi-source intelligence prototype for monitoring changes and keeping review decisions attributable.

Documented functions

- Retain source evidence
- Review temporal changes
- Define watch rules
- Route material alerts
- Manage subject dossiers and review queues

Potential buyer fit

Intelligence software vendors / Research teams / Corporate analysis teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Subject dossiers / Alert queues / Evidence-linked reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/evidence-intelligence-operations-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 150,000	**EUR 800,000**

Current repository documentation

Current main baseline: 6.3.0.

Separate development: 6.4.0 - unmerged authorized-document connector candidate.

Main is 6.3.0. The separate 6.4.0 candidate adds explicitly authorized, bounded local-document collection and verifiable collection receipts. Its retained report records 54 command gates and 192 tests across six installed environments. Historical 6.0.0 and 6.3.0 failures remain failures; repaired 6.3.1/6.3.2 evidence is retained separately. This publication did not rerun those product gates.

Material limitations: Authorized local-file collection has a bounded platform and policy scope. Historical failed releases are not promoted to PASS, and live external-provider ingestion requires separate qualification.

Next qualification step: Review the exact candidate and delivery manifest; qualify controlled read-only HTTPS/API ingestion and each additional operating-system or provider boundary separately.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-005-P: current documentation. TA-IP-005-C: financial-reference review, 16 October 2026. TA-IP-005-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
