Organismal State Dynamics Research Platform

Study changes in organismal regulation through controlled models and documented observations.

Product overview

A research workbench for organismal state changes and controlled human-state hypotheses.

Documented functions

- Organise research observations
- Record protocol execution
- Review signal quality
- Study bounded state hypotheses
- Compare simulation and participant evidence

Potential buyer fit

Human-state research groups / Scientific software vendors / Behavioural research teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Protocol records / State-study reports / Research evidence packages

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/organismal-state-dynamics-research-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 120,000	**EUR 900,000**

Current repository documentation

Current main baseline: 0.7.0.

An implemented prototype for evaluation and further development.

Material limitations: Research estimates do not directly measure subjective experience or give a default consciousness verdict. Clinical validity is not established.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-066-P: current documentation. TA-IP-066-C: financial-reference review, 16 October 2026. TA-IP-066-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
