Organizational Memory Engine

Keep earlier software decisions accessible so your team can review precedents when planning new changes.

Product overview

An organisational memory product for software-change history and precedent-led decisions.

Documented functions

- Retain software-change history
- Retrieve relevant precedents
- Review change risk
- Govern candidate acceptance
- Track recovery and review decisions

Potential buyer fit

Engineering organisations / Developer-tool vendors / Enterprise knowledge teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Precedent records / Risk assessments / Decision histories

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/organizational-memory-engine/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 700,000	**EUR 1,900,000**

Current repository documentation

Current main baseline: 2.27.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Historical precedent supports review rather than guaranteeing the next outcome. External infrastructure execution is separately authorised.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-019-P: current documentation. TA-IP-019-C: financial-reference review, 16 October 2026. TA-IP-019-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
