QUBO Structural Analysis and Optimization Platform

Compare optimisation approaches and assess candidate solutions within a clearly defined problem scope.

Product overview

An optimisation research prototype for structured problem analysis and comparative studies.

Documented functions

- Characterise supplied problems
- Review connectivity and scale
- Compare bounded candidate solutions
- Measure study resource use
- Retain qualification evidence

Potential buyer fit

Optimisation research teams / Planning software vendors / Scientific software developers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Problem diagnostics / Solution comparisons / Scaling reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/qubo-structural-analysis-and-optimization-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 90,000	**EUR 650,000**

Current repository documentation

Current main baseline: 0.2.0.

An implemented prototype for evaluation and further development.

Material limitations: Structural diagnostics do not establish formal impossibility or universal solver superiority. Performance remains problem- and protocol-specific.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-075-P: current documentation. TA-IP-075-C: financial-reference review, 16 October 2026. TA-IP-075-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
