Resource-Aware Hybrid Model Orchestration Platform

Plan long-form AI-assisted work, compare model options and continue interrupted tasks within your available resources.

Product overview

A resource-aware generation and revision prototype for managed long-form work.

Documented functions

- Coordinate generation and revision
- Work within declared resource limits
- Retain project state
- Review configurable quality conditions
- Study optional higher-capability review

Potential buyer fit

Writing-tool developers / AI workflow vendors / Research teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Long-form work records / Revision plans / Resource-accounting reports

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 20,000	**EUR 250,000**

Current repository documentation

Current main baseline: No semantic release version established.

Separate development: 0.1.7rc26 - unmerged orchestration candidate.

An implemented release candidate is available on a development branch; production use requires further qualification.

Material limitations: Provider accounts, third-party model rights, deployment configurations and measured long-form quality remain specific to the selected delivery and validation scope.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-028-P: current documentation. TA-IP-028-C: financial-reference review, 16 October 2026. TA-IP-028-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
