# Secure Actuation Integrity Platform

Review permissions and decision records before authorising a controlled resource action.

## Product overview

A software-only authorisation asset for secure-resource simulation and transfer review.

## Documented functions

- Evaluate action permissions
- Simulate secure-resource scenarios
- Review qualification decisions
- Prepare portable handovers
- Record buyer acceptance evidence

## Potential buyer fit

Security software vendors / Device research groups / Assurance product teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

## Documented output types

Authorisation records / Scenario reports / Transfer packages

## Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/secure-actuation-integrity-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

# Status and commercial reference

| SELLER ASKING REFERENCE | RECREATION ESTIMATE |
| --- | --- |
| **EUR 425,000** | **EUR 1,750,000** |

## Current repository documentation

Current main baseline: 2.9.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: The reference asset has no physical actuator implementation. Software acceptance is separate from real-equipment safety or deployment.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

## Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

## Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

## Source basis

TA-IP-079-P: current documentation. TA-IP-079-C: financial-reference review, 16 October 2026. TA-IP-079-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
