Software Asset Engineering Platform

Inspect a software project, review its recorded evidence and limitations, and prepare a documented package for an acquisition review.

Product overview

A software-inspection prototype for documented asset review and handover preparation.

Documented functions

- Inspect supplied software work products
- Retain review snapshots
- Record supported findings
- Prepare repair-note proposals
- Create review and handover dossiers

Potential buyer fit

Developer-tool vendors / IP transaction teams / Engineering organisations

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Inspection reports / Repair-note proposals / Asset review packages

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 75,000	**EUR 250,000**

Current repository documentation

Current main baseline: v0.1.0.

Separate development: v0.2 internal service-control foundation; unmerged.

Evaluate the existing v0.1 local software-inspection engine. A newer unmerged draft adds internal service-control records, but authentication, hosted storage, live jobs and billing remain unfinished. Current prices cover the local engine; no deployed private SaaS is claimed.

Material limitations: Ingested software is inspected rather than executed. Hosted accounts, live jobs and the required private SaaS remain development work.

Next qualification step: An accepted private SaaS workflow remains required. Current acquisition covers the local engine; its agreed delivery manifest, component obligations and recipient acceptance remain open.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Disclosed base/increment budgets reconcile; effort remains an unverified seller assumption. Original financial-reference date: 2026-10-11. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-098-P: current documentation. TA-IP-098-C: financial-reference review, 16 October 2026. TA-IP-098-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
