Software Asset Provenance & Qualification Platform

Review a software asset’s origin and qualification evidence before accepting a release or handover.

Product overview

A software-asset qualification product for reviewable provenance and release evidence.

Documented functions

- Inventory software work products
- Review provenance records
- Record build and test evidence
- Prepare asset dossiers
- Verify release attestations

Potential buyer fit

Software assurance vendors / IP transaction advisers / Engineering organisations

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Asset dossiers / Release records / Qualification reports

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 240,000	**EUR 850,000**

Current repository documentation

Current main baseline: 0.4.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Technical qualification does not create legal title, patents or certification. Rights conclusions require separately agreed evidence.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-063-P: current documentation. TA-IP-063-C: financial-reference review, 16 October 2026. TA-IP-063-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
