Synthetic Consciousness Engineering Platform

Explore controlled simulations of adaptive behaviour and compare recorded experiments to assess questions for further research.

Product overview

An experimental research asset for testable properties of synthetic-consciousness theories.

Documented functions

- Run controlled computational studies
- Compare candidate theoretical properties
- Review simpler research baselines
- Retain experiment histories
- Support repeatable campaign recovery

Potential buyer fit

Cognition research groups / AI research teams / Scientific software vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Experiment records / Theory comparisons / Research recovery material

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 60,000	**EUR 200,000**

Current repository documentation

Current main baseline: v0.4.0.dev0.

Separate development: v0.4 resumable research controller (merged).

Compare repeatable research studies and resume controlled experiments with the current v0.4 software. All 29 local tests pass. The recorded archive now includes all 20 checkpoint manifests and 152 binary parts; this review did not restore or numerically replay that archive. Consciousness and completion of the planned larger GPU campaign remain unestablished.

Material limitations: Subjective experience and consciousness are not established. Retained historical claims are separate from reproduced runtime evidence.

Next qualification step: Evidence a reproducible release, agreed component and rights boundaries, use-specific qualification and recipient acceptance of the defined software package.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Disclosed base/increment budgets reconcile; effort remains an unverified seller assumption. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-100-P: current documentation. TA-IP-100-C: financial-reference review, 16 October 2026. TA-IP-100-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
