Telluric Actualization Research Platform

Organise geophysical hypotheses and compare the evidence supporting your research questions.

Product overview

A geophysical hypothesis research asset for structured evidence and repeatable studies.

Documented functions

- Organise hypothesis evidence
- Review source-study records
- Track qualification progress
- Prepare repeatable sessions
- Expose missing evidence

Potential buyer fit

Geophysics research groups / Scientific software vendors / Research assurance teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Qualification sessions / Hypothesis reports / Evidence review records

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 55,000	**EUR 600,000**

Current repository documentation

Current main baseline: 0.23.0.dev0.

Experimental research software; scientific conclusions require separate evidence.

Material limitations: The underlying research programme remains speculative and empirically unverified. It is not established as a replacement for accepted physics.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-074-P: current documentation. TA-IP-074-C: financial-reference review, 16 October 2026. TA-IP-074-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
