TLS Virtual

Explore rotating-machine behaviour in simulation and review diagnostic demonstrations and reports.

Product overview

A rotating-machine simulation and diagnostic demonstrator with an explorable twin view.

Documented functions

- Simulate healthy and degraded machines
- Explore fault scenarios
- Review explanatory diagnostics
- Retain machine-state histories
- Produce traceable reports

Potential buyer fit

Industrial software vendors / Maintenance research teams / Technical training providers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Diagnostic demonstrations / Twin snapshots / Scenario reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/tls-virtual/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 195,000	**EUR 650,000**

Current repository documentation

Current main baseline: 1.0.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: The release checks software behaviour against synthetic reference machines. Diagnostic performance on physical machinery is not established.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-010-P: current documentation. TA-IP-010-C: financial-reference review, 16 October 2026. TA-IP-010-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
