TrueLane Intelligence Engine

Compare AI training studies, resume reviewed experiments and assess model candidates using retained evidence.

Product overview

An AI systems-engineering asset for governed model studies and auditable development decisions.

Documented functions

- Manage model evaluation
- Review training studies
- Control candidate promotion
- Retain development evidence
- Review adaptation and recovery records

Potential buyer fit

AI product companies / AI research groups / Enterprise model teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Study records / Candidate comparisons / Model-governance dossiers

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 310,000	**EUR 1,040,000**

Current repository documentation

Current main baseline: 5.8.0-alpha.1.

Compare the current model-adaptation workflow with retained earlier training evidence. The new first-party adaptation software is implemented. Earlier GPU and Drive-resume records remain bounded to v5.6/v5.7; external v5.8 adapter qualification remains open.

Material limitations: Frontier performance is a research objective. Current software and retained studies do not establish general AI superiority.

Next qualification step: Larger reviewed model/data experiments and independent task benchmarks for your intended use.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Partial work-package assumptions; complete cost anchor not reconstructed. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-013-P: current documentation. TA-IP-013-C: financial-reference review, 16 October 2026. TA-IP-013-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
