Universal Capability Synthesis Engine (UCSE)

Find and compare software capabilities for your requirements, then assess how suitable components could work together.

Product overview

A software-capability discovery and qualification prototype for evidence-led choices.

Documented functions

- Describe required capabilities
- Discover candidate software
- Review admission evidence
- Compare benchmark records
- Retain composition provenance

Potential buyer fit

Developer-tool vendors / Enterprise architecture teams / Technology research groups

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Capability inventories / Candidate comparisons / Qualification decisions

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/universal-capability-synthesis-engine/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 150,000	**EUR 800,000**

Current repository documentation

Current main baseline: 0.1.0.

An implemented prototype for evaluation and further development.

Material limitations: Discovery popularity is not technical proof. External software and complete integration remain separately qualified.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-092-P: current documentation. TA-IP-092-C: financial-reference review, 16 October 2026. TA-IP-092-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
