Universal Operations Orchestration & Intelligence Platform

Model your operations, compare resource and workflow scenarios, and review proposed decisions before authorising execution.

Product overview

An operations-orchestration prototype for reviewable resources, scenarios and authorised work.

Documented functions

- Model resources and prerequisites
- Review capacity and deadlines
- Record authorised task progress
- Compare proposed scenarios
- Rank declared candidate plans

Potential buyer fit

Operations software vendors / Enterprise planning teams / Workflow developers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Operational models / Scenario comparisons / Decision evidence records

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 27,000	**EUR 90,000**

Current repository documentation

Current main baseline: 0.4.0.

Evaluate operational models, plan dependencies and compare scenarios using the offline foundation. All 81 local tests, four demonstrations and the small local benchmark passed. Production authentication, hosted operations and autonomous real-world execution remain future work.

Material limitations: The present foundation is distinct from production optimisation or autonomous execution. Simulated plans do not change authoritative operating state.

Next qualification step: Agree the exact v0.4 source, local software delivery manifest, supported environment and recipient acceptance checks.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-103-P: current documentation. TA-IP-103-C: financial-reference review, 16 October 2026. TA-IP-103-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
