Universal Vehicle Configuration Database

Find source-supported vehicle configurations and see where the available information is complete or still uncertain.

Product overview

An independent vehicle-reference product for evidence-backed configuration selection.

Documented functions

- Select supported vehicle configurations
- Review evidence-backed identifiers
- Inspect source qualification
- Handle unsupported selection paths
- Retain configuration lineage

Potential buyer fit

Automotive software vendors / Vehicle-data product teams / Engineering platforms

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Vehicle reference records / Configuration selections / Evidence review packages

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/universal-vehicle-configuration-database/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 125,000	**EUR 1,050,000**

Current repository documentation

Current main baseline: 0.5.6.dev0.

Separate development: PR25 draft / portal, API and offline billing foundations.

Evaluate the vehicle-information prototype and its source-evidence research. New portal, API and offline billing work is private development only; no public SaaS or live payments are available.

Material limitations: Data coverage is evidence-dependent. The asset does not supply universal fitment, vehicle tuning authority or rights in external factual records.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Disclosed base/increment budgets reconcile; effort remains an unverified seller assumption. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-094-P: current documentation. TA-IP-094-C: financial-reference review, 16 October 2026. TA-IP-094-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
