Universal Video Intelligence Platform

Control your video viewing, keep and recover your own timecoded research notes, and turn reviewed observations into source-linked project investigations.

Product overview

A local-first video and research-workspace prototype with controlled exports.

Documented functions

- Adjust viewing controls
- Keep video bookmarks and notes
- Recover private research drafts
- Prepare source-aware project research
- Export controlled review material
- Search private bookmarks and notes locally (v0.9.9 development candidate)

Potential buyer fit

Video-tool developers / Research software vendors / Knowledge-workflow teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Bookmarks / Research workspaces / Offline review exports

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 36,000	**EUR 120,000**

Current repository documentation

Current main baseline: 0.9.8.

Separate development: 0.9.9 / R31 - offline keyboard checks; live shortcut acceptance pending.

Main remains 0.9.8. The unmerged 0.9.9 candidate records source-specific R30 live acceptance in official Chrome and Edge, followed by R31 opt-in quick keyboard access. The R31 Windows offline record reports 310 Node passes, two symlink-related skips, eight keyboard tests passed and 84 R30 Python regressions passed. Actual R31 shortcut acceptance in both browsers remains pending; prior browser passes do not qualify the new feature.

Material limitations: The R31 keyboard change still needs real Chrome and Edge shortcut acceptance. Security, privacy, accessibility, performance and crash/disk durability retain their open gates.

Next qualification step: Validate the R31 shortcut in actual Windows Chrome and Edge, then complete the remaining accessibility, privacy/security, performance and durability gates.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Partial work-package assumptions; complete cost anchor not reconstructed. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-101-P: current documentation. TA-IP-101-C: financial-reference review, 16 October 2026. TA-IP-101-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
