VellumGrid Autonomous Commerce Platform

Organise digital-product creation and fulfilment, and review the operational and financial evidence for your commerce workflow.

Product overview

A digital-commerce product asset for governed creation, fulfilment and delivery.

Documented functions

- Create configurable digital products
- Validate publication packages
- Track fulfilment work
- Control digital delivery
- Review cost and profit evidence

Potential buyer fit

Digital-commerce operators / Commerce software vendors / Product automation teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Digital product packages / Fulfilment records / Commercial review reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/vellumgrid-autonomous-commerce-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 575,000	**EUR 2,400,000**

Current repository documentation

Current main baseline: 0.7.6.dev0.

A newer development build is in progress. Live commercial performance and profitability remain unestablished.

Material limitations: Live store operation and measured profitability are not established. External platform services and buyer commercial operation remain separate.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-087-P: current documentation. TA-IP-087-C: financial-reference review, 16 October 2026. TA-IP-087-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
