Universal-Systems-Intelligence-Engine

Model connected systems, compare scenarios and examine bounded offline forecast studies with traceable evidence.

Product overview

Review connected-system models, supplied observations, scenario branches and local coupled simulations, alongside a developer-research forecast workflow with fixed tasks and chronological data separation. Compare reference predictors, inspect held-out errors and empirical intervals, and retain explicit abstention and evidence limits for further qualification.

Potential acquirers

- Digital-twin vendors
- Systems research groups
- Engineering consultancies

Documented functions

- Compose linked system studies
- Compare declared scenarios
- Review supplied observations
- Run local combined simulations
- Retain attributable histories
- Compare fixed-task offline forecasts with transparent CPU reference predictors
- Review chronological splits, held-out errors, empirical intervals and abstention

Available output types

Scenario comparisons / Observation records / Simulation histories / Bounded forecast-study and reference-comparison reports

Operations, reliability & digital twins

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 50,500	**Prototype**

Current scope and conditions

Locally tested 0.7.0 developer-research prototype. Physical prediction, representative-domain accuracy, independent model qualification and completed acquisition handover remain separate requirements.

Scope and transfer review required

Identified edition: 0.7.0

• A connected-system modelling prototype. Physical prediction and cross-domain accuracy require domain-specific qualification.

• The delivery perimeter and transfer requirements need further review before terms can be finalised.

• The published financial references retain their disclosed v0.6 reproduction scope. The v0.7 research increment requires an expressly agreed delivery allocation and has no separately established monetary reference.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-096 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-10-19. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	50,500	56,828
Negotiation reference - low	40,000	45,012
Negotiation reference - high	63,000	70,894
Recreation cost estimate	167,500	188,488
Marketability cost scenario	134,544	151,402
Monetisation cost scenario	96,103	108,145
Risk-adjusted strategic reference	66,712	75,071
Weighted economic reference	111,354	125,307

Milestone-conditioned reference

EUR 132,215; model change EUR 20,861. Reach the next portfolio maturity stage with source-pinned, reproducible release checks, bounded claims and an agreed operational and handover acceptance scope.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

Recreation estimate: EUR 160,000 of previously scoped work plus EUR 7,500 for v0.7 offline CPU forecast research, giving EUR 167,500. The non-overlapping increment assumes 72 equivalent hours at EUR 94/hour plus 15%, rounded down to EUR 500. Asking and negotiation references retain the earlier seller-selected asking/cost relationships, rounded half-up to EUR 500. Reused foundations are included once; independent qualification, production services and future features are excluded. These are working seller estimates, not recorded spending, contractor quotes or established market value.

Full budget for the stated priced scope. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
