Adaptive Neural Architecture Platform

Evaluate how changes to a learning model affect its performance before choosing a new version.

Product overview

An adaptive learning-model prototype for governed development and candidate acceptance.

Potential acquirers

- AI product developers
- Research groups
- Model-engineering teams

Documented functions

- Build and train learning candidates
- Study controlled model growth
- Compare validation outcomes
- Govern candidate acceptance
- Recover and replay retained states

Available output types

Candidate models / Evaluation records / Recovery material

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 190,000 · indicative USD 213,066

Identified edition: 0.5.0

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	190,000	213,066
Negotiation reference - low	150,000	168,210
Negotiation reference - high	240,000	269,136
Recreation cost estimate	1,000,000	1,121,400
Marketability cost scenario	1,075,250	1,205,785
Monetisation cost scenario	860,625	965,105
Risk-adjusted strategic reference	901,545	1,010,993
Weighted economic reference	952,716	1,068,376

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 1,179,206; model change EUR 226,490.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README documents held-out validation, integrity-bound checkpoint and rollback, early stopping, replay snapshots and canary checks; no fresh model-quality benchmark execution in this review.

Remaining limits

Identity-preserving network growth is not demonstrated general intelligence or broad model superiority; synthetic policies, real canary thresholds and production security remain unqualified.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — An adaptive learning-model prototype for governed development and candidate acceptance. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-076 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
