Air-to-Water Transition Vehicle

Explore a conceptual air-to-water vehicle in simulation and review how its control choices affect the model.

Product overview

A software-only vehicle research environment for studying an air-to-water transition concept.

Potential acquirers

- Vehicle simulation developers
- Aerospace research groups
- Control research teams

Documented functions

- Run transition simulations
- Compare control studies
- Inject modelled faults
- Replay experiment histories
- Retain validation records

Available output types

Simulation histories / Control comparisons / Study reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 40,000 · indicative USD 44,856

Identified edition: v8 Master

Prototype · Scope closure required

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Software-only vehicle research and simulation. Physical vehicles and certified performance are excluded.

• The delivery perimeter and transfer requirements need further review before terms can be finalised.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	40,000	44,856
Negotiation reference - low	30,000	33,642
Negotiation reference - high	50,000	56,070
Recreation cost estimate	400,000	448,560
Marketability cost scenario	214,200	240,204
Monetisation cost scenario	153,000	171,574
Risk-adjusted strategic reference	60,961	68,362
Weighted economic reference	194,776	218,422

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 221,406; model change EUR 26,630.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README documents C 6-DOF simulation, Python/Gymnasium and PPO training, baselines, fault injection and replay; model/hardware acceptance not independently rerun.

Remaining limits

No physical vehicle, flight/water transition prototype, hydro/aerodynamic validation or safety certification.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A software-only vehicle research environment for studying an air-to-water transition concept. The offered edition and material boundaries govern review.

Evidence and validation: E1 — Tests or structured evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T1 — Implementation exists but core transfer evidence is incomplete. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-017 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
