Aurynthiq Autonomous DJ Intelligence Platform

Prepare DJ sets from your own authorised music, audition transitions and review proposed combinations between recordings.

Product overview

A bring-your-own-music prototype for candidate DJ and mashup discovery.

Potential acquirers

- DJ software vendors
- Creator-tool developers
- Music production teams

Documented functions

- Import permitted private music
- Organise a private library
- Screen candidate track combinations
- Audition reviewed previews
- Record permitted export decisions

Available output types

Candidate pairings / Private previews / Analysis and export records

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 46,000 · indicative USD 51,584

Identified edition: 0.12.0

Prototype · Conditional handover

Current scope and conditions

Existing first-party local DJ and music-library prototype plus the implemented v0.11/v0.12 user-library, declared-use, audition and local-export controls, source, tests and documentation. External music, model weights and runtime ownership, independently cleared music rights, professional listening quality, large-library/hardware qualification and a hosted service are excluded.

• A bring-your-own-music research prototype. Music rights, production audio acceptance and commercial performance require separate review.

Conditions before handover

• Agree the exact v0.12 first-party source and prototype delivery manifest, supported dependencies and recipient acceptance checks.

• Reconcile component versions, licences and obligations; recordings, stems and external model assets retain their own rights.

• Complete permissioned listening benchmarks and supported-hardware acceptance for your intended music workflow.

• Qualify the optional model-backed separation path separately; mocked separation tests are not execution of the full model pipeline.

• Keep the local operator-controlled prototype distinct from a production multi-user service or independent music-rights verification.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	46,000	51,584
Negotiation reference - low	34,500	38,688
Negotiation reference - high	57,500	64,481
Recreation cost estimate	290,000	325,206
Marketability cost scenario	283,475	317,889
Monetisation cost scenario	308,306	345,734
Risk-adjusted strategic reference	237,680	266,534
Weighted economic reference	274,044	307,313

Cost basis

Some dated work-package assumptions are disclosed, but they do not reconstruct the complete retained recreation anchor. A complete scope-specific budget is required.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 339,183; model change EUR 65,139.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source documents FFprobe input gates, WAV preview creation, BPM/harmonic pairing, local rights-declaration checks and hash-bound export receipts.

Remaining limits

No proven DJ/mashup quality, externally verified music/composition rights, hostile-actor-resistant DRM, SaaS multi-tenancy, GPU production, paid subscription or public publication.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A bring-your-own-music prototype for candidate DJ and mashup discovery. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-092 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
