Chess Strategic Intelligence Platform

Use CROWN to review chess positions and move history, rehearse local practice decisions and compare bounded native analysis within its stated research limits.

Product overview

A standalone local-first chess analysis and training prototype with legally synchronised board history, bounded native research analysers and a separate owner-interface pathway.

Potential acquirers

- Chess and training-software vendors
- Educational game and practice-platform developers
- Research teams evaluating chess-search methods

Documented functions

- Maintain legal board and move-history state
- Review positions from either side
- Support local practice and actual-move correction
- Compare bounded native search and history-aware caches
- Review reproducible training and analysis records

Available output types

Position and move-history records / Bounded native analysis reports / Practice and evaluation packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 20,000 · indicative USD 22,428

Identified edition: 1.28.0 / native research scope

Prototype · Conditional handover

Current scope and conditions

Specifically agreed first-party implementation and documentation. Only the specifically agreed first-party local chess application, native research analysers and related documentation are priced. Third-party historical games, derived data and external engine ownership rights are not priced as proprietary assets. Independent strength qualification, future search advances, live integrations and production services are excluded.

• The native v1.28 research analyser and its history-safe cache have local software qualification; independent v1.28 acceptance remains pending. The owner interface retains its separately accepted earlier engine pathway.

• World-class strength, verified Elo, guaranteed wins and strength attributable to an optional third-party engine are not established properties of the proprietary native engine.

• Historical game and derived opening-data capsules retain CC BY-SA 4.0 attribution and share-alike terms. Optional external engines retain their own licences and are outside the proprietary first-party price.

Conditions before handover

• Freeze the specific first-party source, delivery documents, transferable rights and exclusions.

• Review retained source-specific qualification and any further independent or intended-use acceptance.

• Keep third-party rights, future capabilities and empirical or competitive claims outside the agreed proprietary scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established. Historical game and derived data capsules retain CC BY-SA 4.0 terms, including attribution and share-alike where applicable; optional external engines are separately licensed. These are not proprietary ownership rights offered by the seller.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	20,000	22,428
Negotiation reference - low	16,000	17,942
Negotiation reference - high	25,000	28,035
Recreation cost estimate	67,000	75,134
Marketability cost scenario	51,255	57,477
Monetisation cost scenario	45,225	50,715
Risk-adjusted strategic reference	25,414	28,499
Weighted economic reference	44,941	50,397

Cost basis

The recreation estimate adopts the lowest expressly scoped seller effort scenario. It is not recorded expenditure, an absolute minimum, an independent quote or established market value. Only the specifically agreed first-party local chess application, native research analysers and related documentation are priced. Third-party historical games, derived data and external engine ownership rights are not priced as proprietary assets. Independent strength qualification, future search advances, live integrations and production services are excluded.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source reports 34 local suites / 1,799 assertions and 159 source hashes, with historic v1.27 32 suites / 1,527 assertions independently inspected.

Remaining limits

Independent v1.28 pinned Colab acceptance pending; no demonstrated Elo or world-class strength, v4 not installed in owner GUI; optional GPLv3 Stockfish and CC BY-SA data require separate rights conditions.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A standalone local-first chess analysis and training prototype with legally synchronised board history, bounded native research analysers and a separate owner-interface pathway. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Source-specific diligence and recipient acceptance remain separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Source-specific diligence and recipient acceptance remain separate.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Source-specific diligence and recipient acceptance remain separate.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. Source-specific diligence and recipient acceptance remain separate.

Buyer information and next step

Quote TA-IP-111 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
