Content Integrity Assurance Platform

Review content and supporting evidence so you can make more accountable integrity decisions.

Product overview

Provider transport controls including pre-request TCP-peer attestation, HTTP response guards and acquisition-runtime qualification.

Potential acquirers

- Content assurance vendors
- Research publishers
- Evidence software teams

Documented functions

- Pre-request peer attestation and transport-boundary checks beyond V61
- Response guards and acquisition-runtime integration
- Adversarial binary/runtime regressions and evidence packaging

Available output types

Integrity findings / Review records / Evidence packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 407,500 · indicative USD 456,971

Identified edition: 71.0.0 release candidate

Developed software · Conditional handover

Current scope and conditions

Specifically agreed first-party 71.0.0 release candidate source, documentation and retained evidence: Provider transport controls including pre-request TCP-peer attestation, HTTP response guards and acquisition-runtime qualification. Offered as implemented candidate software. Full V71 release acceptance, production transport guarantees and independent security assurance remain open.

• Offered as implemented candidate software. Full V71 release acceptance, production transport guarantees and independent security assurance remain open.

• First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

• Qualify the stated candidate release before relying on production or transfer acceptance.

• Run the complete included-edition regression suite and qualify actual signing custody, key services, revocation policy and recipient trust distribution.

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	407,500	456,971
Negotiation reference - low	326,000	365,576
Negotiation reference - high	509,375	571,213
Recreation cost estimate	1,627,000	1,824,518
Marketability cost scenario	1,964,602	2,203,105
Monetisation cost scenario	2,416,095	2,709,409
Risk-adjusted strategic reference	1,982,158	2,222,792
Weighted economic reference	1,976,645	2,216,610

Cost basis

Earlier recreation anchor retained once; its prior coverage and uncertainty remain. Added only the individually described implementation work. 160 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 17,000 adopted recreation increment and EUR 5,000 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source V71 R0 evidence is PASS_NON_RELEASE: 224/224 total, with pinned transport 18/18, response 24/24 and acquisition runtime 62/62. V71 R1 release acceptance is NOT_RUN in the reviewed main record.

Remaining limits

Offered as implemented candidate software. Full V71 release acceptance, production transport guarantees and independent security assurance remain open.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — Provider transport controls including pre-request TCP-peer attestation, HTTP response guards and acquisition-runtime qualification. The offered edition and material boundaries govern review.

Evidence and validation: E4 — E3 plus repository-retained independent/external validation evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-071 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
