Continuum State Integrity Platform

Verify deterministic system-state consistency, state recovery and checkpointed replay with fail-stop integrity controls.

Product overview

Typed provenance and deterministic replay, bounded checkpoint ingestion and recovery.

Potential acquirers

- Reliability teams
- Audit software vendors
- Systems research groups

Documented functions

- Review state consistency
- Record attributable changes
- Identify contradictory records
- Replay retained histories
- Study bounded disruption scenarios

Available output types

Consistency findings / Change histories / Replay reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 176,500 · indicative USD 197,927

Identified edition: 2.5.1

Developed software · Conditional handover

Current scope and conditions

Specifically agreed first-party 2.5.1 source, documentation and retained evidence: Typed provenance and deterministic replay, bounded checkpoint ingestion and recovery. Intended-use recovery, security, rights and recipient acceptance remain separate.

- Intended-use recovery, security, rights and recipient acceptance remain separate.
- First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

- Freeze the 2.5.1 first-party delivery and reconcile source-specific acceptance records.
- An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	176,500	197,927
Negotiation reference - low	141,200	158,342
Negotiation reference - high	220,625	247,409
Recreation cost estimate	806,500	904,409
Marketability cost scenario	762,143	854,667
Monetisation cost scenario	616,973	691,874
Risk-adjusted strategic reference	454,734	509,939
Weighted economic reference	636,605	713,889

Cost basis

Earlier recreation anchor retained once; its prior coverage and uncertainty remain. Added only the individually described implementation work. 64 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 6,500 adopted recreation increment and EUR 1,500 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source reports 86 regression tests for the committed recovery/provenance edition.

Remaining limits

Intended-use recovery, security, rights and recipient acceptance remain separate.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — Typed provenance and deterministic replay, bounded checkpoint ingestion and recovery. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-004 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
