Custody Integrity Assurance Platform

Simulate accountable custody handovers, inject defined recovery failures and reproduce the resulting evidence packages.

Product overview

A custody-assurance candidate with deterministic reference processing, multi-organisation pilot simulation, executable recovery scenarios and reproducible evidence packaging.

Potential acquirers

- Supply-chain software vendors
- Custody service providers
- Audit and assurance teams

Documented functions

- Process accountable custody transitions
- Evaluate conformance and witness-quorum rules
- Run multi-organisation synthetic pilot scenarios
- Execute eight defined recovery and failure-injection cases
- Produce deterministic evidence packages and audit digests

Available output types

Custody and conformance records / Synthetic pilot and recovery reports / Reproducible evidence packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 140,000 · indicative USD 156,996

Identified edition: 0.6.0 / synthetic pilot and executable recovery candidate

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• The source report documents 8/8 synthetic recovery exercises and 34/34 recovery-specific checks, not a complete independent final-tree PASS of all five validators. Full-source acceptance and live recovery remain open.

• Real deployment failover, approved RTO/RPO performance, deployed independent witnesses, cryptographic operations and live-pilot acceptance remain open. Synthetic recovery results do not close those gates.

• Governance, independent review, security, legal/privacy, operational and recipient approvals remain required. The retained recreation anchor lacks a complete work-package budget and receives no uplift for this increment.

• CIAP main 0.6.0 has bounded synthetic recovery evidence: 8/8 exercises and 34/34 recovery-specific checks, not a complete independent current-tree five-validator PASS. Pilot, real failover/RTO/RPO, governance, security and legal approvals remain open. EUR 140,000 dated seller ask and EUR 750,000 legacy reproduction estimate have no complete work-package budget.

Conditions before handover

• Review confidential security and credential-handling materials within the agreed diligence and transfer scope.

• Reproduce the agreed candidate and complete intended-environment recovery and accountable approval gates.

• Reconstruct the retained recreation estimate using an explicit delivery-specific work breakdown before reliance.

• Independently rerun and preserve exact-source PASS evidence for all five offline validators before approval.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	140,000	156,996
Negotiation reference - low	110,000	123,354
Negotiation reference - high	175,000	196,245
Recreation cost estimate	750,000	841,050
Marketability cost scenario	769,781	863,232
Monetisation cost scenario	835,313	936,720
Risk-adjusted strategic reference	645,424	723,778
Weighted economic reference	734,417	823,575

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance. Current candidate 0.6.0 adds synthetic pilot and recovery software; the retained anchor and asking reference are unchanged. No price premium is assigned to modeled RTO/RPO or unapproved deployment capabilities.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 911,176; model change EUR 176,759.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Repository implements deterministic transfer/custody checks and evidence pack generation; GATE-REF-001 internally passed per open-gates register.

Remaining limits

Governance, independent review, security, legal/privacy, operations and real measured recovery approvals remain OPEN.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A custody-assurance candidate with deterministic reference processing, multi-organisation pilot simulation, executable recovery scenarios and reproducible evidence packaging. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-009 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
