Digital Template Commerce Platform

Prepare self-hosted digital-template sales with package integrity, order evidence and Bitcoin-payment reconciliation through separately operated commerce infrastructure.

Product overview

Template-commerce source with staged evidence export, vault/ledger integrity, entitlement and download checks, and controlled runtime-acceptance tooling.

Potential acquirers

- Digital-product commerce software vendors
- Template-publishing and creator-tool businesses
- Self-hosted commerce integration developers

Documented functions

- Check package release metadata and ZIP integrity
- Record delivery consent and per-line licence identifiers
- Reconcile declared order and BTCPay payment evidence
- Maintain idempotent, tamper-evident ledger records
- Prepare backup, ledger anchors and annual evidence exports

Available output types

Package and order-line licence records / Consent, payment and refund evidence / Ledger anchors, backups and annual export packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 10,500 · indicative USD 11,775

Identified edition: 0.7.0 accepted / 0.8.0 development

Prototype · Rights and staging review required

Current scope and conditions

Specifically agreed first-party 0.7.0 accepted / 0.8.0 development source, documentation and retained evidence: Template-commerce source with staged evidence export, vault/ledger integrity, entitlement and download checks, and controlled runtime-acceptance tooling. No live checkout/payment acceptance, deployment or trading business is included. The existing budget already covers qualification tooling, so no additional price premium is adopted.

• No live checkout/payment acceptance, deployment or trading business is included. The existing budget already covers qualification tooling, so no additional price premium is adopted.

• First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

• Qualify the stated candidate release before relying on production or transfer acceptance.

• Freeze the specific first-party source, delivery documents, transferable rights and exclusions.

• Complete platform licence-compatibility review and real WordPress/WooCommerce/BTCPay staging acceptance before distribution or operational use.

• Review retained source-specific qualification and further independent or intended-use acceptance.

• Keep third-party rights, future capabilities and unverified empirical claims outside the agreed proprietary scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	10,500	11,775
Negotiation reference - low	8,500	9,532
Negotiation reference - high	13,000	14,578
Recreation cost estimate	34,500	38,688
Marketability cost scenario	26,393	29,597
Monetisation cost scenario	26,781	30,032
Risk-adjusted strategic reference	13,086	14,675
Weighted economic reference	23,840	26,734

Cost basis

The recreation estimate adopts the lowest expressly scoped seller effort scenario. It is not recorded expenditure, an absolute minimum, an independent quote or established market value. Only the agreed first-party extension, theme and documentation are priced, subject to rights and compatibility review. Platform ownership, customer or payment data, a trading business, live operations, hosting and third-party licences are excluded.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Frozen v0.7 CPU acceptance is retained; v0.8/TCE0.4 changes PHP and shell code and requires fresh source and real staging acceptance.

Remaining limits

No live checkout/payment acceptance, deployment or trading business is included. The existing budget already covers qualification tooling, so no additional price premium is adopted.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — Template-commerce source with staged evidence export, vault/ledger integrity, entitlement and download checks, and controlled runtime-acceptance tooling. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Source-specific diligence and recipient acceptance remain separate.

Rights and component obligations: R0 — No repository licence evidence identified. Source-specific diligence and recipient acceptance remain separate.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Source-specific diligence and recipient acceptance remain separate.

Delivery and handover: T1 — Implementation exists but core transfer evidence is incomplete. Source-specific diligence and recipient acceptance remain separate.

Buyer information and next step

Quote TA-IP-115 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
