Evidence-Governed Software Assurance Platform

Compare software components against your requirements and review the evidence before selecting them.

Product overview

A software-assurance asset for controlled component discovery and qualification.

Potential acquirers

- Developer-tool companies
- Software assurance teams
- Enterprise architecture groups

Documented functions

- Discover candidate components
- Review capability and rights evidence
- Compare benchmark records
- Control qualification decisions
- Retain governance and recovery histories

Available output types

Component dossiers / Comparison records / Qualification decisions

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 475,000 · indicative USD 532,665

Identified edition: 40.0.0

Developed software · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• Review confidential security and credential-handling materials within the agreed diligence and transfer scope.

• A generated, release-specific component inventory and licensing report are required; inventory-generation software is not the completed report.

• An explicit delivery manifest and buyer handover scope must be agreed; runtime transaction features do not establish acquisition readiness.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	475,000	532,665
Negotiation reference - low	380,000	426,132
Negotiation reference - high	595,000	667,233
Recreation cost estimate	1,200,000	1,345,680
Marketability cost scenario	1,890,000	2,119,446
Monetisation cost scenario	2,760,000	3,095,064
Risk-adjusted strategic reference	3,044,719	3,414,348
Weighted economic reference	2,295,652	2,574,344

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

v40 source records 114 focused local checks over candidate adapters; v41 proposed live evidence bundle with 25 repository-native tests not yet accepted.

Remaining limits

Provider and signing authority real-live evidence not complete; v41 unmerged and no external production qualification.

Development position

v41: live qualification evidence bundle and fail-closed readiness

Acquisition evidence profile

Technical scope: V — A software-assurance asset for controlled component discovery and qualification. The offered edition and material boundaries govern review.

Evidence and validation: E4 — E3 plus repository-retained independent/external validation evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-039 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
