Fractal Physics Discovery Platform

Reproducible fractal mathematics, exact-rational certificate checking and bounded engineered-potential research; no experimental new-physics claim.

Product overview

Reproducible fractal mathematics, exact-rational return-interval certificates and bounded pattern catalogues with engineered photonic-potential research tools.

Potential acquirers

- Computational mathematics groups
- Photonic simulation researchers
- Scientific software developers

Documented functions

- Fractal computation and exact-rational certificate producer/verifier
- Pattern provenance, deduplication and bounded model experiments
- CLI, independent numerical checks and acceptance packaging

Available output types

Mathematical certificates / Pattern catalogues / Numerical model reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 15,000 · indicative USD 16,821

Identified edition: R3I

Research software · Scope closure required

Current scope and conditions

Specifically agreed first-party R3I source, documentation and retained evidence: Reproducible fractal mathematics, exact-rational return-interval certificates and bounded pattern catalogues with engineered photonic-potential research tools. G2 remains HOLD; no experimental measurements, demonstrated new physics or hardware. Duplicated catalogue entries are not independent discoveries.

- G2 remains HOLD; no experimental measurements, demonstrated new physics or hardware. Duplicated catalogue entries are not independent discoveries.
- First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

- Freeze the R3I first-party delivery and reconcile source-specific acceptance records.
- Agree the exact first-party source edition, deliverable manifest and recipient acceptance criteria.
- Reconcile third-party components, source terms and transferable first-party rights.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	15,000	16,821
Negotiation reference - low	12,000	13,457
Negotiation reference - high	18,750	21,026
Recreation cost estimate	51,500	57,752
Marketability cost scenario	25,608	28,717
Monetisation cost scenario	19,699	22,090
Risk-adjusted strategic reference	9,116	10,223
Weighted economic reference	25,127	28,177

Cost basis

Initial bounded work-package estimate. 480 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 51,500 adopted recreation increment and EUR 15,000 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Milestone-conditioned reference

EUR 36,862; model change EUR 11,735.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source R3I acceptance records 504/504 CPU tests, 22 commands and 44 verified logs; 496 mathematical intervals and six unique pattern classes.

Remaining limits

G2 remains HOLD; no experimental measurements, demonstrated new physics or hardware. Duplicated catalogue entries are not independent discoveries.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: R — Reproducible fractal mathematics, exact-rational return-interval certificates and bounded pattern catalogues with engineered photonic-potential research tools. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified.

Rights and component obligations: R0 — No repository licence evidence identified.

Commercial basis: C2 — Seller ask and reproducible economic reference established.

Delivery and handover: T1 — Implementation exists but core transfer evidence is incomplete.

Buyer information and next step

Quote TA-IP-122 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
