FusionLunar Energy Systems Engineering Platform

Compare energy and lunar-logistics concepts for your systems-engineering studies, with a separately scoped launch and transport module.

Product overview

An energy and lunar-infrastructure research platform with traceable engineering studies.

Potential acquirers

- Energy research groups
- Aerospace consultancies
- Mission architecture teams

Documented functions

- Compare energy-system scenarios
- Study lunar infrastructure
- Review logistics dependencies
- Assess engineering uncertainty
- Retain qualified release records

Available output types

Architecture comparisons / Engineering studies / Qualification dossiers

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 360,000 · indicative USD 403,704

Identified edition: 0.46.0

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Energy and lunar-infrastructure analysis software. Physical hardware, construction and demonstrated energy production are excluded.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	360,000	403,704
Negotiation reference - low	290,000	325,206
Negotiation reference - high	450,000	504,630
Recreation cost estimate	2,900,000	3,252,060
Marketability cost scenario	1,885,725	2,114,652
Monetisation cost scenario	1,663,875	1,865,869
Risk-adjusted strategic reference	935,005	1,048,515
Weighted economic reference	1,762,172	1,976,100

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 2,075,686; model change EUR 313,514.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README records v0.45 656/656 complete regressions and external checks; a pre-release v0.46 development tree passed 667/667 but was modified for release sealing afterward.

Remaining limits

v0.46 final complete independent reruns not established by earlier development PASS; no commercially viable fusion propulsion, lunar deployment or experimentally proven energy-system capability.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — An energy and lunar-infrastructure research platform with traceable engineering studies. The offered edition and material boundaries govern review.

Evidence and validation: E4 — E3 plus repository-retained independent/external validation evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-057 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
