Gossquibble

Prepare entertainment-satire publishing workflows and review bounded release, cost, encryption and recovery conditions before any separately approved launch.

Product overview

A standalone prelaunch publishing-software asset with controlled editorial workflows, operating-cost review, joint synthetic recovery, optional encryption qualification and temporary nonce/commit rehearsal.

Potential acquirers

- Digital media publishers
- Entertainment editorial teams
- Publishing-workflow software vendors

Documented functions

- Organise editorial, timing and controlled release workflows
- Review bounded usage-cost and incident records
- Rehearse joint static-site and synthetic database recovery
- Review retention, key-custody and optional encryption conditions
- Exercise encrypted synthetic restoration and temporary nonce journals

Available output types

Editorial and release-review packages / Usage-cost and incident reports / Synthetic recovery and retention assessments / Encryption and journal qualification reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 43,000 · indicative USD 48,220

Identified edition: R5.41 prelaunch

Prototype · Conditional handover

Current scope and conditions

Specifically agreed first-party implementation and documentation for R5.41 prelaunch. The previously priced editorial, release, cost, continuity and prelaunch rehearsal foundations are reused once. Added joint recovery, retention, bounded key-custody/encryption and synthetic journal software is included. Real source/content rights, customer or operator data, durable production backups, host provisioning, paid API use and publication are excluded.

• Prelaunch software with offline qualification; live publication, licensed news sources, editorial/legal acceptance and real host operation remain separately gated.

• Recovery and encryption exercises use explicitly synthetic disposable material. They do not establish durable real backups, recoverable production keys, independent anti-rollback, offsite custody or recovery-time guarantees.

• Optional third-party cryptography is qualified only in the stated test scope. Production integration, licensed content, real paid services and an operating publication are excluded unless separately agreed.

Conditions before handover

• Freeze the source-specific delivery edition, transferable rights and exclusions.

• Review component obligations, source-specific reproducibility and security evidence under agreed confidentiality.

• Complete intended-use and recipient-environment acceptance before relying on the identified outputs.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	43,000	48,220
Negotiation reference - low	34,000	38,128
Negotiation reference - high	53,500	59,995
Recreation cost estimate	143,000	160,360
Marketability cost scenario	109,395	122,676
Monetisation cost scenario	101,351	113,655
Risk-adjusted strategic reference	54,242	60,827
Weighted economic reference	96,884	108,646

Cost basis

The retained expressly priced scope and successive non-overlapping implementation budgets reconcile below. Equivalent effort and historical anchors remain seller assumptions, not actual expenditure, independent quotations or market value. The previously priced editorial, release, cost, continuity and prelaunch rehearsal foundations are reused once. Added joint recovery, retention, bounded key-custody/encryption and synthetic journal software is included. Real source/content rights, customer or operator data, durable production backups, host provisioning, paid API use and publication are excluded.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README describes offline-only fictional late-night satire newsroom, synthetic SQLite rows, prelaunch HOLD and internal evidence chains; R5.42 PR targets 1463 tests not run on exact head.

Remaining limits

No public launch, real source-content rights, production security/VPS, paid API operation or independent offsite key/witness custody. R5.42 unmerged, full Colab acceptance NOT_RUN.

Development position

R5.42 — Separate synthetic rollback witness and recovery checkpoint assurance; Complete Gossquibble source import: 100 articles, website, newsroom and integrity gates

Acquisition evidence profile

Technical scope: P — A standalone prelaunch publishing-software asset with controlled editorial workflows, operating-cost review, joint synthetic recovery, optional encryption qualification and temporary nonce/commit rehearsal. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R1 — Repository licence file identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-109 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
