HΛRM LYRA Automotive

Explore the LYRA automotive concept and compare its design assumptions through engineering analysis and simulation.

Product overview

An automotive engineering-analysis asset for the LYRA RS programme.

Potential acquirers

- Automotive research teams
- Engineering consultancies
- Vehicle concept developers

Documented functions

- Maintain design parameters
- Review chassis and powertrain studies
- Compare aerodynamic calculations
- Track structural evidence
- Export engineering telemetry

Available output types

Design study records / Parameter dossiers / Engineering comparisons

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 55,000 · indicative USD 61,677

Identified edition: 0.1.0

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Automotive engineering-analysis software. Physical vehicles, manufacturing assets and certified vehicle performance are excluded.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	55,000	61,677
Negotiation reference - low	45,000	50,463
Negotiation reference - high	70,000	78,498
Recreation cost estimate	450,000	504,630
Marketability cost scenario	309,825	347,438
Monetisation cost scenario	258,188	289,532
Risk-adjusted strategic reference	153,622	172,272
Weighted economic reference	279,870	313,846

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 330,368; model change EUR 50,498.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source provides Python requirements, model assumptions, deterministic unit-test tooling and separate evidence registers; no independent physical verification cited in inspected README.

Remaining limits

No manufactured or tested vehicle, lab dyno/wind-tunnel proof, ECU calibration, homologation, OEM/third-party rights or operational safety certification.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — An automotive engineering-analysis asset for the LYRA RS programme. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-089 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
