Higher-Dimensional Geometry Visualization Platform

Offline-first native 4D geometry, projections, sections and browser demonstrators. Not a physical extra-dimension observation or production release.

Product overview

Native 4D geometry, projections and sections with offline browser workstations, versioned session exchange and a deterministic Linux x86-64 distribution.

Potential acquirers

- Mathematics education developers
- Scientific visualization teams
- Geometry research laboratories

Documented functions

- Native 4D geometry, projections, sections and independent oracles
- Interactive workstation controls and versioned offline sessions
- Linux packaging, keyboard controls and CPU/RSS qualification

Available output types

Projected geometry / Session exchange files / CPU/RSS reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 18,000 · indicative USD 20,185

Identified edition: P4 R3

Research software · Scope closure required

Current scope and conditions

Specifically agreed first-party P4 R3 source, documentation and retained evidence: Native 4D geometry, projections and sections with offline browser workstations, versioned session exchange and a deterministic Linux x86-64 distribution. No physical extra-dimension observation, direct human 4D vision, general WCAG certification, Windows/macOS qualification or leak audit.

• No physical extra-dimension observation, direct human 4D vision, general WCAG certification, Windows/macOS qualification or leak audit.

• First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

• Freeze the P4 R3 first-party delivery and reconcile source-specific acceptance records.

• Agree the exact first-party source edition, deliverable manifest and recipient acceptance criteria.

• Reconcile third-party components, source terms and transferable first-party rights.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	18,000	20,185
Negotiation reference - low	14,400	16,148
Negotiation reference - high	22,500	25,232
Recreation cost estimate	60,500	67,845
Marketability cost scenario	30,084	33,736
Monetisation cost scenario	27,225	30,530
Risk-adjusted strategic reference	10,709	12,009
Weighted economic reference	30,335	34,018

Cost basis

Initial bounded work-package estimate. 560 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 60,500 adopted recreation increment and EUR 18,000 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Milestone-conditioned reference

EUR 44,937; model change EUR 14,602.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source records accepted P3 R11 and P4 R1–R3 CI; 31 labelled controls, four actions and 45 native CPU/RSS observations. Later documentation is not a separate runtime acceptance.

Remaining limits

No physical extra-dimension observation, direct human 4D vision, general WCAG certification, Windows/macOS qualification or leak audit.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: R — Native 4D geometry, projections and sections with offline browser workstations, versioned session exchange and a deterministic Linux x86-64 distribution. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified.

Rights and component obligations: R0 — No repository licence evidence identified.

Commercial basis: C2 — Seller ask and reproducible economic reference established.

Delivery and handover: T1 — Implementation exists but core transfer evidence is incomplete.

Buyer information and next step

Quote TA-IP-121 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
