Industrial Predictive Maintenance & RUL Platform

Study equipment condition and compare remaining-life estimates to support your maintenance research.

Product overview

An industrial prediction asset for condition modelling and remaining-life studies.

Potential acquirers

- Maintenance software vendors
- Industrial research groups
- Equipment-data teams

Documented functions

- Organise machine telemetry
- Review data quality
- Compare condition models
- Estimate remaining service life
- Retain validation evidence

Available output types

Prediction records / Quality reports / Benchmark dossiers

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 360,000 · indicative USD 403,704

Identified edition: 0.2.0

Developed software · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Condition and remaining-life research software. Equipment-specific predictive performance requires representative data and acceptance.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	360,000	403,704
Negotiation reference - low	290,000	325,206
Negotiation reference - high	450,000	504,630
Recreation cost estimate	1,000,000	1,121,400
Marketability cost scenario	1,575,000	1,766,205
Monetisation cost scenario	2,200,000	2,467,080
Risk-adjusted strategic reference	2,537,266	2,845,290
Weighted economic reference	1,893,043	2,122,858

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README describes unit-safe train/validation/test splitting, operator-supplied NASA C-MAPSS official test path and source-hashed validation manifests.

Remaining limits

Official held-out dataset results and independent real industrial prediction reliability not certified by repository code; not SIL-rated or autonomous shutdown capability.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — An industrial prediction asset for condition modelling and remaining-life studies. The offered edition and material boundaries govern review.

Evidence and validation: E4 — E3 plus repository-retained independent/external validation evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-059 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
