# Intelligent Media Acquisition & Production Engine

Offline-first C++ rights-admission preflight for locally supplied manifests. Media acquisition and finished production are not yet implemented.

## Product overview

Native C++20 rights-admission preflight for locally supplied manifests; confinement checks and deterministic all-or-nothing admission reports.

## Potential acquirers

- Media workflow developers
- Documentary production studios
- Rights-management software teams

## Documented functions

- Read local rights-admission manifests
- Confine referenced media and evidence paths
- Reject incomplete or uncertain admissions
- Export deterministic admission and selection reports

## Available output types

Admission reports / Approved local media selections

# Defined work. Separate written terms.

## Seller asking reference / AS IS

EUR 2,500 · indicative USD 2,804

Identified edition: 0.1.0 / R0

Prototype · Scope closure required

## Current scope and conditions

Specifically agreed first-party 0.1.0 / R0 source, documentation and retained evidence: Native C++20 rights-admission preflight for locally supplied manifests; confinement checks and deterministic all-or-nothing admission reports. Human approval assertions are checked, not legally verified. Crawling, decoding, composition and production-quality media export are not implemented on main.

- Human approval assertions are checked, not legally verified. Crawling, decoding, composition and production-quality media export are not implemented on main.
- First-party rights, exact delivery and recipient acceptance require project-specific agreement.

## Conditions before handover

- Freeze the 0.1.0 / R0 first-party delivery and reconcile source-specific acceptance records.
- Agree the exact first-party source edition, deliverable manifest and recipient acceptance criteria.
- Reconcile third-party components, source terms and transferable first-party rights.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

# Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

| Price / model reference | EUR | USD - indicative |
|---|---|---|
| Seller asking reference | 2,500 | 2,804 |
| Negotiation reference - low | 2,000 | 2,243 |
| Negotiation reference - high | 3,125 | 3,504 |
| Recreation cost estimate | 8,500 | 9,532 |
| Marketability cost scenario | 6,503 | 7,292 |
| Monetisation cost scenario | 5,738 | 6,435 |
| Risk-adjusted strategic reference | 3,224 | 3,615 |
| Weighted economic reference | 5,702 | 6,394 |

## Cost basis

Initial bounded work-package estimate. 80 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 8,500 adopted recreation increment and EUR 2,500 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

## Milestone-conditioned reference

EUR 6,782; model change EUR 1,080.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

# Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

## Retained source evidence

Main contains the native prototype and local regression record. Broader R1–R10h development is confined to an unmerged candidate and excluded from this initial price.

## Remaining limits

Human approval assertions are checked, not legally verified. Crawling, decoding, composition and production-quality media export are not implemented on main.

## Development position

IMAPE R1–R10h experimental media & inference isolation candidate — HOLD

## Acquisition evidence profile

Technical scope: P — Native C++20 rights-admission preflight for locally supplied manifests; confinement checks and deterministic all-or-nothing admission reports. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified.

Rights and component obligations: R0 — No repository licence evidence identified.

Commercial basis: C2 — Seller ask and reproducible economic reference established.

Delivery and handover: T1 — Implementation exists but core transfer evidence is incomplete.

## Buyer information and next step

Quote TA-IP-120 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
