LYRA-AERO eVTOL

Compare electric-aircraft design options and explore simulated flight and energy assumptions.

Product overview

An electric-aircraft analytical prototype for transparent concept comparisons.

Potential acquirers

- Electric-flight research teams
- Engineering consultancies
- Aerospace simulation vendors

Documented functions

- Review lift and power assumptions
- Compare energy requirements
- Study endurance scenarios
- Explore design alternatives
- Retain analytical audit records

Available output types

Concept comparisons / Energy studies / Design exploration reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 50,000 · indicative USD 56,070

Identified edition: 0.1.0

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Electric-aircraft analytical software. Physical aircraft and certified flight performance are excluded.

Conditions before handover

• Validation/qualification evidence not identified.

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	50,000	56,070
Negotiation reference - low	40,000	44,856
Negotiation reference - high	60,000	67,284
Recreation cost estimate	450,000	504,630
Marketability cost scenario	309,825	347,438
Monetisation cost scenario	258,188	289,532
Risk-adjusted strategic reference	153,622	172,272
Weighted economic reference	279,870	313,846

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 330,368; model change EUR 50,498.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Repository exposes power/energy/lift equations, repeatable design-space search, CLI and assumption/evidence ledger; no executed hardware or high-fidelity flight evidence.

Remaining limits

No CFD/FEM/rotor tests, real aircraft, battery thermal validation, airworthiness, flight-dynamics certification or physical feasibility acceptance.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — An electric-aircraft analytical prototype for transparent concept comparisons. The offered edition and material boundaries govern review.

Evidence and validation: E1 — Tests or structured evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-090 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
