Maastricht Zero-Hour Simulator

Explore the developing Maastricht driving-simulation project and its foundations for interactive vehicle scenarios.

Product overview

A Maastricht driving-simulation foundation for buyer-led completion.

Potential acquirers

- Driving simulation developers
- Vehicle research teams
- Interactive experience studios

Documented functions

- Prepare a city simulation project
- Configure vehicle and input foundations
- Record telemetry
- Review modelled damage components
- Retain session and validation records

Available output types

Simulation foundations / Telemetry records / Implementation documentation

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 120,000 · indicative USD 134,568

Identified edition: 0.1.0

Prototype · Scope closure required

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• A driving-simulation foundation. Completion, target-device performance and packaging are separately scoped.

• The delivery perimeter and transfer requirements need further review before terms can be finalised.

Conditions before handover

• Repository licence file not identified.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	120,000	134,568
Negotiation reference - low	95,000	106,533
Negotiation reference - high	150,000	168,210
Recreation cost estimate	650,000	728,910
Marketability cost scenario	571,838	641,259
Monetisation cost scenario	559,406	627,318
Risk-adjusted strategic reference	479,458	537,664
Weighted economic reference	556,559	624,125

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 683,792; model change EUR 127,233.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source documents Unreal C++ vehicle, telemetry, damage and input skeleton with repository validation tooling; complete editor build and Chaos driveable test vehicle remain future gates.

Remaining limits

No compiled production/editor acceptance, 1:1 Maastricht mapping, physically calibrated vehicle behavior, live traffic or licensed world-asset delivery.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A Maastricht driving-simulation foundation for buyer-led completion. The offered edition and material boundaries govern review.

Evidence and validation: E1 — Tests or structured evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R0 — No repository licence evidence identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T1 — Implementation exists but core transfer evidence is incomplete. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-088 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
