Manuscript Integrity & Publishing Platform

Write and assemble your chapters, track editorial evidence and defects, and prepare an author-approved manuscript for manual publication handoff.

Product overview

A manuscript-production prototype for editorial evidence and author-controlled release.

Potential acquirers

- Author-software vendors
- Editorial teams
- Small publishing houses

Documented functions

- Write and assemble chapters
- Inspect ordinary manuscript inputs
- Track quality evidence and defects
- Record explicit author release decisions
- Prepare manual publication handovers

Available output types

Assembled manuscripts / Editorial evidence records / Offline handover packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 21,000 · indicative USD 23,549

Identified edition: 0.1.0

Prototype · Conditional handover

Current scope and conditions

Existing first-party v0.1.0 local manuscript authoring, DOCX assembly, evidence-linked eight-gate/40-stage quality workflow, defect and change controls, explicit author release authorization, read-only dashboard, manual Draft2Digital handoff, tests and documentation at the frozen repository baseline. The embedded author-supplied protocol must have separately agreed use/transfer rights. Author manuscripts, creative archive ownership, author identity/pen-name rights, third-party services and templates, separately staged v0.2–v0.5 application code, automated literary/factual certification, autonomous book generation, live distribution and future SaaS are outside this price.

• A manuscript and editorial-evidence prototype. Author content, literary judgement and publication acceptance remain under separate control.

Conditions before handover

• Freeze the agreed v0.1 source and delivery manifest, including recipient acceptance of the supported Python environment and manual book handoff.

• Agree the permission and transfer treatment of the embedded author-supplied QA protocol and Word template; author manuscripts, creative archives and pseudonym rights are separately scoped.

• Complete the delivery-specific component/provenance and security declaration; no independent legal title or security certification is established.

• If the v0.5 offline build is requested, first import and verify its complete source archive and repeat its source-specific tests; a staging document does not include that application code.

• Perform real editorial, factual, accessibility, visual DOCX and distributor checks for every actual book before author authorization.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	21,000	23,549
Negotiation reference - low	16,800	18,840
Negotiation reference - high	26,250	29,437
Recreation cost estimate	70,000	78,498
Marketability cost scenario	53,550	60,051
Monetisation cost scenario	49,613	55,636
Risk-adjusted strategic reference	26,552	29,775
Weighted economic reference	47,426	53,184

Cost basis

Disclosed base/increment assumptions reconcile to the retained recreation anchor. Effort remains an analyst estimate for its original scope.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Milestone-conditioned reference

EUR 56,486; model change EUR 9,060.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source documents 8 gates/40 stages, deterministic hash-bound evidence and defect/release blocking with manual D2D packaging.

Remaining limits

Automated structural checks do not prove full literary quality, legal publishing rights, publisher/platform acceptance or finished professional rendering for arbitrary manuscripts.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A manuscript-production prototype for editorial evidence and author-controlled release. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R1 — Repository licence file identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-105 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
