MT2050 Experimental Dynamics

Compare advanced-dynamics scenarios and review how assumptions and uncertainty affect your simulated results.

Product overview

A dynamic-systems research platform for comparable, replayable engineering studies.

Potential acquirers

- Vehicle research teams
- Simulation software vendors
- Engineering consultancies

Documented functions

- Create configurable dynamic-system studies
- Review calibration evidence
- Compare model versions
- Assess uncertainty
- Replay qualification packages

Available output types

Engineering comparisons / Calibration records / Replayable study dossiers

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 250,000 · indicative USD 280,350

Identified edition: 0.14.0

Developed software · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	250,000	280,350
Negotiation reference - low	200,000	224,280
Negotiation reference - high	315,000	353,241
Recreation cost estimate	1,200,000	1,345,680
Marketability cost scenario	972,000	1,090,001
Monetisation cost scenario	918,000	1,029,445
Risk-adjusted strategic reference	579,947	650,353
Weighted economic reference	880,981	987,932

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source describes frozen validation protocols, blocked/bootstrap uncertainty, data-quality and model-version controls with repository-native release harness.

Remaining limits

No measured advanced propulsion, anti-gravity, faster-than-light, certified navigation, or physically verified flight behavior.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — A dynamic-systems research platform for comparable, replayable engineering studies. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-031 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
