Multimodal Evidence Adaptive Systems Platform

Bring different forms of observation together and compare their contribution to your research.

Product overview

A multimodal research prototype for coordinated observation and attributable experiments.

Potential acquirers

- Sensor research groups
- Scientific software vendors
- Human-state research teams

Documented functions

- Organise multiple observation streams
- Review quality and missing data
- Align recorded sessions
- Study adaptive experiments
- Retain research provenance

Available output types

Observation sessions / Study reports / Replay records

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 115,000 · indicative USD 128,961

Identified edition: 0.2.0

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• A multimodal research prototype. Human-state conclusions and physical sensor performance require domain-specific qualification.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Release identity and provenance evidence remain incomplete.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	115,000	128,961
Negotiation reference - low	90,000	100,926
Negotiation reference - high	145,000	162,603
Recreation cost estimate	650,000	728,910
Marketability cost scenario	667,144	748,135
Monetisation cost scenario	756,844	848,725
Risk-adjusted strategic reference	559,367	627,274
Weighted economic reference	643,076	721,145

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 798,461; model change EUR 155,385.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source reports 19/19 local tests and repeatable golden replay on bounded synthetic inputs.

Remaining limits

No claims of behavioral control, consciousness, external device operations, general AI or empirical multimodal performance; extensions remain planned.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — A multimodal research prototype for coordinated observation and attributable experiments. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-056 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
