Narrative Collectibles Platform

Manage collectible identities and narratives, review simulated commerce and prepare controlled local verification and recovery.

Product overview

An object-independent local reference platform for collectible registries, editorial narratives and controlled simulated commerce.

Potential acquirers

- Collectible registry software teams
- Narrative product studios
- Independent collection operators

Documented functions

- Manage collectible and edition records
- Review narratives and editorial decisions
- Study simulated order and stock workflows
- Apply local access and privacy controls
- Export offline verification and recovery packages

Available output types

Collectible registry records / Editorial review summaries / Simulated commerce reports / Verification and recovery packages

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 17,500 · indicative USD 19,625

Identified edition: 0.8.0 / R7

Prototype · Conditional handover

Current scope and conditions

Specifically agreed first-party 0.8.0 / R7 local reference implementation, documentation and retained developer evidence. Real payments, production identity services and operating businesses are excluded.

• Commerce uses simulated transactions; real payments, production identity services and hosted operations are excluded.

• Narrative checks do not establish literary originality, translation quality or third-party rights clearance.

• Portable integrity verification does not independently establish ownership, historical truth or external trust.

Conditions before handover

• Agree and freeze the exact first-party delivery edition, rights, third-party obligations and excluded content.

• Review source-specific reproducibility, component and security documentation under agreed confidentiality.

• Complete the relevant application qualification and recipient handover acceptance.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	17,500	19,625
Negotiation reference - low	13,500	15,139
Negotiation reference - high	22,500	25,232
Recreation cost estimate	57,500	64,481
Marketability cost scenario	43,988	49,328
Monetisation cost scenario	42,694	47,877
Risk-adjusted strategic reference	21,810	24,458
Weighted economic reference	39,345	44,121

Cost basis

The recreation estimate comprises the retained expressly priced scope and the separately disclosed non-overlapping implementation budgets. Historical anchors and each successive scoped increment reconcile in the calculation below. Equivalent effort is a seller estimate; market value, actual expenditure and independent quotations are not established. Reuses the priced registry, editorial and simulated-commerce foundations. Real payments, production identity services, externally trusted provenance and hosted operations are excluded.

Coverage describes stated seller estimates only. All recreation amounts have an explicit scoped budget; effort remains an assumption.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

README describes deterministic edition assignment, fictional narrative records, local role-scoped SQLite commerce, HMAC backup and portable source verification.

Remaining limits

No legal title/payment verification, shipping provider, authenticated public multi-tenancy, real sales, privacy/security certification or live commerce. HMAC local receipts not independent notarization.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — An object-independent local reference platform for collectible registries, editorial narratives and controlled simulated commerce. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R1 — Repository licence file identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-108 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
