Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• Target-environment suitability, deployment acceptance and any required independent qualification are agreed separately.

Conditions before handover

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• Release identity and provenance evidence remain incomplete.

• An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source describes search ranking, sandbox-gated benchmarks, signed candidate provenance and repository-native verification entrypoint.

Remaining limits

Search ranking and benchmarks are not provider license adjudication, supply-chain security assurance or suitability in all deployments; isolation backend must be available for untrusted code.

Development position

No open pull request at the captured source snapshot.
