Organizational Memory Engine

Keep earlier software decisions accessible so your team can review precedents when planning new changes.

Product overview

A governed organisational memory and software-change review engine with precedent retrieval, acceptance decisions, durable recovery freshness, trust-store contracts and offline release evidence.

Potential acquirers

- Engineering organisations
- Developer-tool vendors
- Enterprise knowledge teams

Documented functions

- Retrieve attributable software-change precedents
- Govern candidate acceptance and recovery decisions
- Enforce recovery evidence freshness
- Review trust-store and release consistency
- Run the offline release qualification gate

Available output types

Precedent records / Risk assessments / Decision histories

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 703,000 · indicative USD 788,344

Identified edition: 2.31.0

Developed software · Conditional handover

Current scope and conditions

Specifically agreed first-party implementation, documentation and retained evidence for 2.31.0. Third-party software, datasets, models, content, service entitlements and future qualification remain subject to separate terms.

• Governance records do not authorise production traffic or infrastructure. Provider API execution and public-key nonrepudiation are outside the demonstrated core.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	703,000	788,344
Negotiation reference - low	562,500	630,788
Negotiation reference - high	879,000	985,711
Recreation cost estimate	1,908,500	2,140,192
Marketability cost scenario	3,005,888	3,370,803
Monetisation cost scenario	4,389,550	4,922,441
Risk-adjusted strategic reference	4,842,372	5,430,236
Weighted economic reference	3,651,043	4,094,280

Cost basis

Recreation estimate: EUR 1,900,000 retained scope component plus EUR 8,500 for the explicitly scoped implementation work budget, giving EUR 1,908,500. The scoped budget assumes 80 equivalent hours at EUR 94/hour plus 15%, rounded down to EUR 500. The retained scope component has no complete per-role reconstruction budget and remains a low-confidence seller estimate. The asking reference and negotiation bounds preserve the seller-selected asking/cost relationships, rounded to EUR 500; they are transaction assumptions, not measured market value.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

OME v2.31 documents 12 native gates, 561 tests, zero failures/skips/warnings, exact source hash in README.

Remaining limits

No approved production traffic or OME-core infrastructure execution; fresh source execution and independent transfer/security diligence not performed.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: V — A governed organisational memory and software-change review engine with precedent retrieval, acceptance decisions, durable recovery freshness, trust-store contracts and offline release evidence. The offered edition and material boundaries govern review.

Evidence and validation: E3 — Tests, validation and provenance/release evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-019 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
