QUBO Structural Analysis and Optimization Platform

QUBO structural-analysis research software with a separately specified weighted Max-3-SAT encoding, explicit auxiliary-variable accounting and bounded exhaustive objective checks.

Product overview

Structural QUBO analysis with bounded encodings, benchmark laboratory, batched solvers, resumable campaigns, QPLIB corpus ingestion and paired statistical/Pareto analysis.

Potential acquirers

- Optimisation research teams
- Planning software vendors
- Scientific software developers

Documented functions

- Batched solver and benchmark laboratory beyond 0.3
- Resumable campaigns and source-qualified QPLIB corpus
- Paired statistics, Pareto analysis and negative-control regression

Available output types

Problem diagnostics / Solution comparisons / Scaling reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 97,500 · indicative USD 109,337

Identified edition: 0.8.0

Prototype · Conditional handover

Current scope and conditions

Specifically agreed first-party 0.8.0 source, documentation and retained evidence: Structural QUBO analysis with bounded encodings, benchmark laboratory, batched solvers, resumable campaigns, QPLIB corpus ingestion and paired statistical/Pareto analysis. No universal solver superiority, complexity breakthrough, quantum advantage or current GPU qualification is inferred.

- No universal solver superiority, complexity breakthrough, quantum advantage or current GPU qualification is inferred.
- First-party rights, exact delivery and recipient acceptance require project-specific agreement.

Conditions before handover

- Freeze the 0.8.0 first-party delivery and reconcile source-specific acceptance records.
- Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.
- A detailed component inventory and licensing report are required for the agreed delivery scope.
- Third-party licensing and obligations documentation remains incomplete.
- A security assessment or an explicit statement of its absence is required before acceptance.
- Release identity and provenance evidence remain incomplete.
- An explicit delivery manifest and handover scope remain to be agreed.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	97,500	109,337
Negotiation reference - low	78,000	87,469
Negotiation reference - high	121,875	136,671
Recreation cost estimate	675,500	757,506
Marketability cost scenario	439,244	492,568
Monetisation cost scenario	387,568	434,619
Risk-adjusted strategic reference	217,792	244,232
Weighted economic reference	410,465	460,295

Cost basis

Earlier recreation anchor retained once; its prior coverage and uncertainty remain. Added only the individually described implementation work. 240 assumed hours at EUR 94/hour, 15% coordination allowance; EUR 25,500 adopted recreation increment and EUR 7,500 asking-reference increment. No premium for version labels, test counts, scientific claims, future work or unrelated assets.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 483,492; model change EUR 73,027.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

Source records 95 tests with 91 passing and four optional CUDA skips for the latest CPU scope; earlier GPU evidence is edition-specific. Analytics adds bootstrap and multiplicity-aware comparisons.

Remaining limits

No universal solver superiority, complexity breakthrough, quantum advantage or current GPU qualification is inferred.

Development position

No open pull request at the captured source snapshot.

Acquisition evidence profile

Technical scope: P — Structural QUBO analysis with bounded encodings, benchmark laboratory, batched solvers, resumable campaigns, QPLIB corpus ingestion and paired statistical/Pareto analysis. The offered edition and material boundaries govern review.

Evidence and validation: E2 — The current local suite passes its executed tests. The separate deterministic encoding campaign checks bounded formulas under the stated variable, clause and penalty assumptions. Independent recipient and intended-use acceptance remain separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T3 — T2 plus validation, build/release and dependency-disclosure evidence. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-075 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
