Resource-Aware Hybrid Model Orchestration Platform

Plan long-form AI-assisted work, compare model options and continue interrupted tasks within your available resources.

Product overview

A resource-aware generation and revision prototype for managed long-form work.

Potential acquirers

- Writing-tool developers
- AI workflow vendors
- Research teams

Documented functions

- Coordinate generation and revision
- Work within declared resource limits
- Retain project state
- Review configurable quality conditions
- Study optional higher-capability review

Available output types

Long-form work records / Revision plans / Resource-accounting reports

Defined work. Separate written terms.

Seller asking reference / AS IS

EUR 20,000 · indicative USD 22,428

Identified edition: Delivery edition to be agreed

Prototype · Conditional handover

Current scope and conditions

Seller-owned first-party rights plus specifically agreed transferable software/delivery artifacts; website displays and third-party ownership rights excluded from standalone software asset value.

• A generation and revision workflow prototype. Third-party model and service entitlements are separately scoped.

Conditions before handover

• Dependency manifest exists without an identified lockfile; reproducibility should be reviewed.

• A detailed component inventory and licensing report are required for the agreed delivery scope.

• Third-party licensing and obligations documentation remains incomplete.

• A security assessment or an explicit statement of its absence is required before acceptance.

• Agree and freeze the exact development-branch delivery perimeter before transfer; draft status is retained.

• Full release validation of the exact current candidate remains required before acceptance.

The seller offers only the expressly agreed first-party rights it owns or controls, to the extent transferable. Third-party materials retain their own terms. Independent title and freedom-to-operate opinions are not established.

Prices & sources.

Price basis: 2026-11-10. EUR is authoritative; market value is not established.

Price / model reference	EUR	USD - indicative
Seller asking reference	20,000	22,428
Negotiation reference - low	15,000	16,821
Negotiation reference - high	25,000	28,035
Recreation cost estimate	250,000	280,350
Marketability cost scenario	268,813	301,447
Monetisation cost scenario	291,094	326,433
Risk-adjusted strategic reference	225,386	252,748
Weighted economic reference	253,367	284,126

Cost basis

The retained recreation anchor has no explicit per-role work-package budget in the current methodology register. It remains a low-confidence seller estimate requiring reconstruction before reliance.

Coverage describes stated seller estimates only. The retained earlier anchor lacks a complete work breakdown; added scope does not validate it.

Milestone-conditioned reference

EUR 315,052; model change EUR 61,685.

Conditional model sensitivity only; no future asking price, income forecast or accepted scientific result.

Individual source review.

Reviewed 10 November 2026. Current main documentation, source inventory and open candidate status; no fresh execution of private product tests.

Retained source evidence

PR #1 documents deterministic secret-free provider profile, posture-stage checks and readiness recomputation; unmerged draft scope is not accepted as released.

Remaining limits

No independent end-to-end GGUF/model-quality, RAM/latency or provider billing acceptance; RC26 not merged.

Development position

Build Resource-Aware Hybrid Model Orchestration Platform through 0.1.7rc26

Acquisition evidence profile

Technical scope: P — A resource-aware generation and revision prototype for managed long-form work. The offered edition and material boundaries govern review.

Evidence and validation: E2 — Tests plus validation/qualification evidence identified. Detailed source-specific records are reviewed under agreed confidentiality; independent intended-use acceptance remains separate.

Rights and component obligations: R2 — R1 plus dependency/third-party disclosure basis identified. Review the agreed first-party rights, third-party obligations and delivery perimeter.

Commercial basis: C2 — Seller ask and reproducible economic reference established. Market value is not established.

Delivery and handover: T2 — Source, documentation, tests and licence evidence support bounded handover. The listed conditions and written delivery agreement govern acceptance.

Buyer information and next step

Quote TA-IP-028 and the project title. Agree the exact first-party edition, rights, delivery manifest and recipient acceptance separately.
